Education

Telkom University Surabaya 2021 – 2025
Information Systems - GPA 3.47 / 4.00

SMK IPIEMS 2016 - 2019
Multimedia

Project

UI/UX Designer & Front-end Developer - Dashboard Monitoring Jun 2026 - Aug 2026
Designed the UI/UX and developed a responsive Vue.js frontend for a monitoring dashboard integrated with the HikCentral Pro API, working closely with Django and PostgreSQL backend developers.

Full-stack Developer - Browsbyveron Jun 2026 – Oct 2026
Continuously develop and customize additional features for a beauty studio website from the MVP phase, utilizing a Vue.js frontend and Django backend to accommodate dynamic client requirements.

WordPress Developer - PT. Pancar Cahaya Terang Landing Page Jun 2026 - Jul 2026
Built a company profile landing page website using WordPress to strengthen the client's digital business visibility.

Full-stack Developer - Warehouse Management System Mar 2026 - Apr 2026
Designed the initial architecture (MVP) for the digitalization of a warehouse recording system, migrating from a manual Excel format to a web application using Nuxt.js, Laravel, and PostgreSQL.

Front-end Developer - Otopark (Automatic Parking System) Jan 2026 - Mar 2026
Developed an automatic parking system using React.js for the monitoring interface and Django for the admin dashboard, and integrated Raspberry Pi hardware for gate control automation.

Front-end Developer - HiviPlay Nov 2025 - Dec 2025
Contributed to the development of a sports match highlight recording application using Vue.js, integrated with a Django backend system

Full-stack Developer - Employee Attendance Website. Jun 2025
Developed an employee attendance system website using Laravel and MySQL to streamline attendance tracking and manage employee data efficiently.

Front-end Developer - Roti Alit Website Mar 2025
Developed an e-commerce website using Laravel, MySQL, and Docker to support product sales, as an extension of a university assignment project.

UI/UX Designer - MOOC Unocos (Final Year Project Research) Oct 2024 - Dec 2024
Designed the user interface and user experience for a MOOC platform using the IDEO Human-Centered Design method, utilizing Figma and Adobe Photoshop for supporting assets, as part of a final year thesis project.

Front-end Developer - Kampungbebek.com May 2024 - Jul 2024
Developed a website using Laravel and MySQL as part of a community service program in Kampung Bebek, Kebonsari, Sidoarjo Regency.

Video Editor - UKM CODER Profile Video Jul 2022 - Aug 2022
Edited a profile video using Adobe Premiere Pro and Adobe After Effects to deliver engaging and dynamic visual transitions.
